A BAG FOR YOUR COOKING GEAR

## HEAT-IT

All weather cooking system

Heat-It is a patented system developed to improve the efficiency of standard mountain stoves.

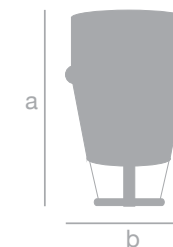

It is composed by a high-technology fire retardant and anti fire fabrics.

Heat-It has a very light universal structure wich can be used with most kinds of stoves and canisters.

Heat-It increases the energetic efficiency of the stove in over 40% without wind and even more in cold and windy conditions.

## DIMENSIONS

a - 23 cm / 9 in  
b - 18 cm / 7 in

## WEIGHT

179 gr / 6,3 oz

## SPECS

- ▶ Fire Proof inside fabric.
- ▶ Highly Fire retardant outer Fabric.

In 7 knots of wind condition

## FEATURES

- . It protects the flame from the wind
- . It can be used in big wall climbing or simply hanged up, increasing the user's safety
- . It transports all the cooking equipment inside
- . It can be used as an oven to cook bread, cakes, etc, becoming the first mountain oven
- . And all in 168 gr
- . Stove and canister NOT INCLUDED

## JET STREAM 2

Expedition Tent  
4 Season

## JET STREAM 2

### 4 Season Expedition Tent

The JET STREAM 2 tent was developed to endure the toughest conditions.

The structural concept, by increasing the number of crossings, increases the resistance to strong winds and optimizes the area between poles.

Its shape allows both occupants to sit anywhere with comfort, minimizing the claustrophobia effect.

The color scheme illuminates the interior in the morning and evening and shadows it during the heat hours.

To be used where everything else should fail.

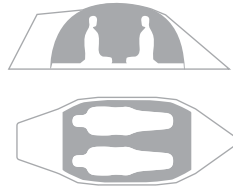

## DIMENSIONS

- a - 112 cm / 44 in
- b - 147 cm / 57,9 in
- c - 378 cm / 148,8 in

## CAPACITY

2 persons

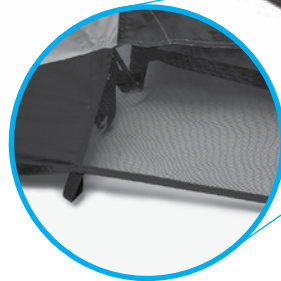

## WEIGHT

Minimum: 4.57 kg / 161,202 oz  
Total Pack: 4,967 kg / 175,205 oz

## TENSORS

Reflective tensors to be seen at night.

## NET ABSIDES

For resistance to abrasion with significant improvement in ventilation.

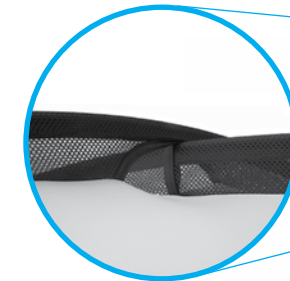

## VENTILATORS

2 side ventilators for improved safety and comfort. Can be used in bad weather conditions.

## FEATURES

- . DAC featherlite TM poles
- . YKK zippers
- . simetric shape for easy assembly
- . mesh pole sleeves for easy assembly and better ventilation
- . 2 dual canopy and mesh doors
- . 2 dry entry vestibules
- . 4 mesh interior pockets
- . net absides for better ventilation
- . 2 side ventilators for increase safety and comfort
- . side straps for hard soil fixation without pegs
- . extruded duralumin pegs
- . Reflective guyline loops and glow-in-the-dark zipper pulls
- . UV resistant fabrics
- . thermal sealed sewings
- . Extra mesh pockets (sold separately)
- . footprint (sold separately)

## POLE CROSSINGS

Maximized pole crossings for load dispersion. With mesh sleeves for better ventilation.

## SPECS

- **Body**  
40 D / 240 T nylon ripstop
- **Fly**  
70 D / 190 T nylon ripstop  
Silicone coated outer surface  
5000 mm PU coated inner surface
- **Floor**  
70 D / 210 T nylon  
10000 PU coated taffeta
- **Pegs**  
Y extruded Duralumin

## SOIL STRAPS

For hard soil fixation without pegs, with rocks, snow or ice.

## COLORED POLES

Colored identifiable poles for easy assembly.

**JET  
STREAM 2+**

Expedition Tent  
4 Season

## JET STREAM 2+

### 4 Season Expedition Tent

The JET STREAM 2+ tent was developed to endure the toughest conditions.

The structural concept, by increasing the number of crossings, increases the resistance to strong winds and optimizes the area between poles.

Its shape allows both occupants to sit anywhere with comfort, minimizing the claustrophobia effect.

The color scheme illuminates the interior in the morning and evening and shadows it during the heat hours.

To be used where everything else should fail.

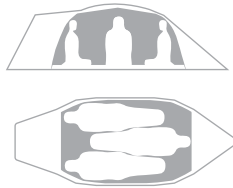

### DIMENSIONS

a - 108 cm / 42,5 in  
b - 186 cm / 73,2 in  
c - 379 cm / 149,2 in

### CAPACITY

2 / 3 persons.

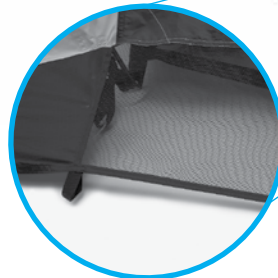

### WEIGHT

Minimum: 4,94 kg / 174,253 oz  
Total Pack: 5,33 kg / 188,116 oz

**TENSORS**  
Reflective tensors to be seen at night.

**NET ABSIDES**  
For resistance to abrasion with significant improvement in ventilation.

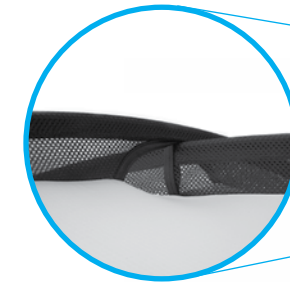

**VENTILATORS**  
2 side ventilators for improved safety and comfort. Can be used in bad weather conditions.

### FEATURES

- . DAC featherlite TM poles
- . YKK zippers
- . simetric shape for easy assembly

- . footprint (sold separately)

## POLE CROSSINGS

Maximized pole crossings for load dispersion. With mesh sleeves for better ventilation.

## SPECS

- **Body**  
40 D / 240 T nylon ripstop
- **Fly**  
70 D / 190 T nylon ripstop  
Silicone coated outer surface  
5000 mm PU coated inner surface
- **Floor**  
70 D / 210 T nylon  
10000 PU coated taffeta
- **Pegs**  
Y extruded Duralumin

## SOIL STRAPS

For hard soil fixation without pegs, with rocks, snow or ice.

## COLORLED POLES

Colored identifiable poles for easy assembly.

## TUPEK

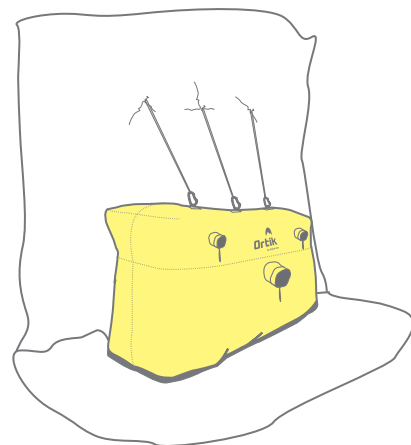

Shelter for 2

## TUPEK

Shelter for 2

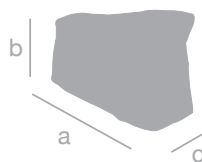

The **Tupek** is a new concept of shelter. It was developed to give an immediate protection for 2 persons in case they need it. It is intended to allow 2 users to sit or lie down with comfort. The structure is made by your weight and rucksack, or by your walking poles, if you have them. Use it for a brief stop, a few hours or, if needed, sleep inside.

Always have it with you!

### DIMENSIONS

- a - 230 cm / 90,5 in
- b - 80 cm / 31,5 in
- c - 65 cm / 25,6 in

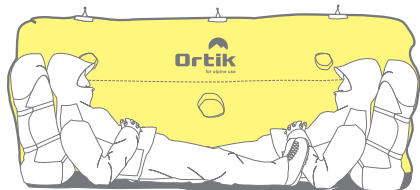

### WALL FIXATION

The Tupek, when used next to a wall or rocky surface, can be hung with by 2 or 3 fixation points.

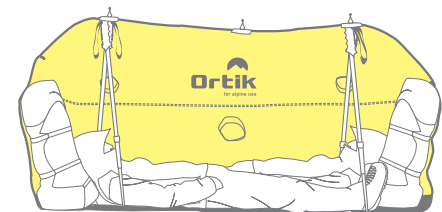

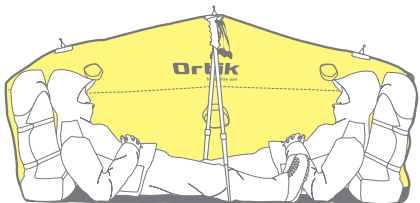

### HABITABILITY

#### Without Trekking Poles

### REST

#### With Trekking Poles

### SLEEP

### FEATURES

- Low weight and volume
- Protects 2 users with gear inside
- Immediate protection with comfort
- Super fast assembly

### SPECS

- ▶ 70 D / 190 T nylon ripstop
- ▶ Silicone coated outer surface
- ▶ 1500 mm PU coated inner surface
  
- ▶ 70 D / 210 T nylon
- ▶ 1500 PU coated taffeta

### CAPACITY

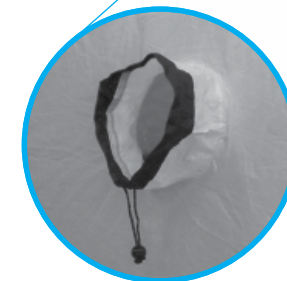

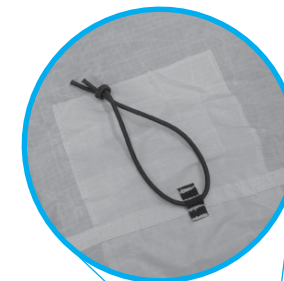

2 persons

### WEIGHT

795 gr / 28 oz

### SUSPENSIONS

Even though there is no pole structure, the fixations help maintain the shape for habitability and comfort.

### VENTILATORS

3 side ventilators for safety and comfort.

### ENTRANCE

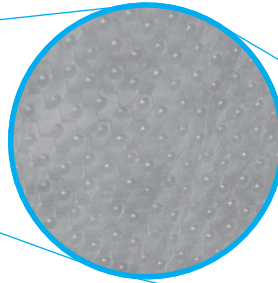

Easy access door with velcro sealed entrance.

# BODY LITE

Self Inflating Mat  
Alpine

**COMFORT**  
2 different heights  
for comfort and lightweight.

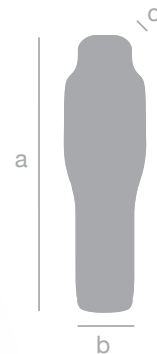

**SURFACE**  
Anti sliding surface  
for comfort.

## DIMENSIONS

a - 177 cm / 69,7 in  
b - 52 cm / 20,4 in  
c - 3 cm / 1,18 in  
2 cm / 0,718 in

## WEIGHT

692 gr / 24.3 oz

# BODY LITE and BACK LITE

## Alpine Self-Inflating Mats

The Body Lite and Back Lite mats were developed to reduce weight and improve comfort.

The increase of air space in the structural foam reduces weight while increasing comfort and insulation.

The anti sliding top surface keeps the user on top while sleeping.

## SPECS

- ▶ 68 D / 68 D polyester honeycomb ripstop
- ▶ Anti-slip surface on top
- ▶ 18 kg/m3 foam density

# BACK LITE

Self Inflating Mat  
Summit

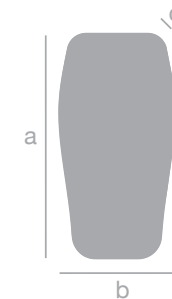

## DIMENSIONS

a - 97,5 cm / 38,4 in  
b - 50 cm / 19,7 in  
c - 3 cm / 1,18 in

## WEIGHT

376 gr / 13.3 oz

**INFLATION**  
High quality inflating valve
